

# UNLOCKING COST SAVINGS AND STRATEGIC INSIGHTS FOR BREWERIES

For small to medium-sized breweries, understanding the Cost of Goods Sold (COGS) is vital to maximizing profitability. With our *Comparative Cost Analysis Service*, your brewery can gain actionable insights into production costs, and identify cost-saving opportunities that directly impact your bottom line.

## OUR SERVICES

### COST BENCHMARKING

By comparing your costs against market rates for similar sized businesses, we provide a detailed perspective on where your brewery stands and highlight targeted recommendations to enhance your financial performance.

### MATERIAL ANALYSIS

We dive deep into the components of COGS —such as raw materials and packaging — enabling you to understand where you're excelling and where adjustments could yield significant savings.

### RECOMMENDATIONS

By analyzing and understanding your brewery's unique cost structure, we provide informed recommendations about sourcing, pricing, and cost efficiency that can amount to thousands in savings annually.

### CUSTOMIZED APPROACH

We will tailor our approach and analysis according to the needs of your business. Only concerned about packaging? We will make it our focus. Malt contracts keeping you up at night? We can help with that.

## PARTNER WITH BRIXEY & MEYER

Let us help you gain the clarity you need to grow and thrive in a competitive market. Contact us today to schedule your own analysis and start transforming your cost structure.
